EXPERIMENT 6

Text Generation using OpenAI LLM API

Name	K Lokesh
Register Number	192472020

AIM

To demonstrate text generation for a given prompt using an OpenAI-style LLM task.

PROCEDURE

1. Open Python IDLE, VS Code, PyCharm, or Google Colab.
2. Display a predefined prompt about Artificial Intelligence.
3. Prepare a sample generated response for the prompt.
4. Display the prompt and the generated text.
5. Run the program and observe the output.

PROGRAM

```
print("Text Generation using OpenAI LLM API")

prompt = "Explain Artificial Intelligence"
print("\nPrompt:", prompt)

generated_text = """
Artificial Intelligence (AI) is a branch of computer
science that enables machines to perform tasks that
normally require human intelligence.
"""

print("\nGenerated Text:")
print(generated_text)
```

OUTPUT

```
prompt = "Explain Artificial Intelligence"

print("\nPrompt:", prompt)

output = """
Artificial Intelligence (AI) is a branch of computer
science that enables machines to perform tasks that
normally require human intelligence.
"""

print("\nGenerated Text:")
print(output)
```

```
Text Generation using OpenAI LLM API

Prompt: Explain Artificial Intelligence

Generated Text:

Artificial Intelligence (AI) is a branch of computer
science that enables machines to perform tasks that
normally require human intelligence.
```

RESULT

Thus, the program demonstrating text generation using an OpenAI-style prompt was executed successfully.
