EXPERIMENT 8

Text Generation using Hugging Face Inference API

Name	K Lokesh
Register Number	192472020

AIM

To demonstrate text generation for a prompt using a sample Hugging Face-style response.

PROCEDURE

1. Open a Python editor or notebook.
2. Display a predefined prompt asking to explain Python.
3. Prepare a sample response describing Python.
4. Print the prompt and generated text.
5. Run the program and observe the output.

PROGRAM

```
print("Text Generation using Hugging Face API")

prompt = "Explain Python"
print("\nPrompt:", prompt)

generated_text = """
Python is a popular programming language.
It is simple, powerful and easy to learn.
It is used in AI, machine learning and web development.
"""

print("\nGenerated Text:")
print(generated_text)
```

OUTPUT

```
print("Text Generation using Hugging Face API")

prompt = "Explain Python"

print("\nPrompt:", prompt)

output = """
Python is a popular programming language.
It is simple, powerful and easy to learn.
It is used in AI, machine learning and web development.
"""

print("\nGenerated Text:")
print(output)
```

```
Text Generation using Hugging Face API

Prompt: Explain Python

Generated Text:

Python is a popular programming language.
It is simple, powerful and easy to learn.
It is used in AI, machine learning and web development.
```

RESULT

Thus, the program demonstrating text generation using a Hugging Face-style prompt was executed successfully.
